FOR REAL ESTATE AGENTS

15 Fable 5 Prompts That Write Listings While You Show Houses.

Claude Fable 5 is the strongest model Anthropic has ever shipped, and it is sitting inside every paid Claude plan right now. These 15 prompts turn it into your **listing writer, follow-up machine, and marketing department** — each one built for the work an agent actually does between showings.

FABLE 5 FREE WINDOW CLOSES JULY 19

Fable 5 is included in paid Claude plans until July 19, 2026 at 11:59 PM PT — after that it moves to usage credits. Run these while it costs you nothing extra.

15	6	1
COPY-PASTE PROMPTS	PARTS PER PROMPT: ROLE TO FORMAT	REUSABLE ASSET PER PROMPT

How to run these in 3 steps.

No technical setup. If you can paste text, you can run every prompt in this pack.

1

Open Claude and pick Fable 5

Go to `claude.ai` (or Claude Code if you use it) and select **Fable 5** in the model picker. It is included in every paid plan until July 19 — no extra cost during the window.

2

Paste the prompt, fill the [BRACKETS]

Copy a prompt from this pack exactly as written. Everything in `[UPPERCASE BRACKETS]` is yours to fill — the address, the neighborhood, your past listing copy. The more real detail you paste, the better the output. Fable 5 handles huge amounts of context, so do not summarize — paste the whole thing.

3

Save the output as a template

Every prompt here produces something reusable — a listing framework, a follow-up sequence, a neighborhood guide. Save each one. That is the point: you keep the asset long after the free window closes.

Pro habit: end every session with one more line.

Before you close the chat, type: "Turn what you just built into a fill-in-the-blanks template I can reuse for every future listing." Fable 5 will package its own work. That template is yours forever.

01 The Listing Description Machine

When to use: every new listing — this replaces the blank-page hour with a five-minute fill-in.

```
You are a top-producing listing agent who writes descriptions that make buyers book showings, not skim.

GOAL: Write the full listing description for [PROPERTY ADDRESS] — MLS version, plus a shorter portal version — and build me a reusable listing-description template for every future property.

CONTEXT: Property facts: [BEDS / BATHS / SQFT / LOT / YEAR BUILT / PRICE]. Standout features: [LIST THE 3-5 THINGS A BUYER NOTICES IN PERSON]. Neighborhood: [NAME + WHAT IT IS KNOWN FOR]. Target buyer: [FIRST-TIME / MOVE-UP / DOWNSIZER / INVESTOR]. Two of my past descriptions so you match my voice: [PASTE THEM].

CONSTRAINTS: No fair-housing violations — never describe the buyer, only the property. No cliches ("must see", "won't last"). Every claim must come from the facts I pasted. Lead with the feature that photographs worst but shows best — that is what the description exists to sell.

PROCESS: Draft, then reread as a skeptical buyer scrolling at 11pm, then tighten.

OUTPUT FORMAT: MLS description (max [CHARACTER LIMIT]), 100-word portal version, then the blank reusable template.
```

PRO TIP Paste your MLS character limit — Fable 5 will hold it exactly, which most models will not.

02 The Open House Follow-Up Sequence

When to use: the Sunday evening after an open house, while the sign-in sheet is still warm.

```
You are a real estate follow-up specialist who turns open-house visitors into clients without sounding like a drip campaign.

GOAL: Write my complete open-house follow-up sequence — first text within 2 hours, email next morning, value follow-up day 3, soft check-in day 10 — personalized by visitor type.

CONTEXT: The property: [ADDRESS + PRICE + 2-LINE SUMMARY]. Visitor types from my sign-in sheet: serious buyers, neighbors, just-looking, and other agents. What visitors asked about most: [THE REAL QUESTIONS FROM SUNDAY]. My voice: [PASTE 2 TEXTS YOU HAVE ACTUALLY SENT CLIENTS].

CONSTRAINTS: Texts under 300 characters. Every message gives something (an answer, a comp, a similar listing) before it asks anything. Neighbors get a different track — they are future sellers, not buyers. Nothing that reads like automation.

PROCESS: Write the serious-buyer track first, then adapt per visitor type, then flag which messages I can reuse for every future open house.

OUTPUT FORMAT: One table per visitor type: day, channel, message ready to send.
```

PRO TIP Run this once, then keep the neighbor track — it is a listing-lead generator disguised as courtesy.

03 The Neighborhood Guide Builder

When to use: once per farm area — it becomes your website page, buyer handout, and relocation email in one.

```
You are a local-market content strategist for real estate agents.

GOAL: Build the definitive neighborhood guide for [NEIGHBORHOOD/SUBURB] — the one a relocating buyer would bookmark — structured so I can publish it on my site and hand it out as a PDF.

CONTEXT: What I know from working this area: [SCHOOLS PEOPLE ASK ABOUT, COMMUTE REALITIES, THE STREETS THAT SELL FASTEST, LOCAL SPOTS BUYERS FALL FOR]. Typical price bands: [RANGES BY PROPERTY TYPE]. Who moves here: [THE 2-3 BUYER PROFILES YOU ACTUALLY SEE].

CONSTRAINTS: Only facts I supplied or clearly marked [VERIFY] slots — never invent school ratings, crime stats, or price data. Write like a knowledgeable neighbor, not a brochure. Include an FAQ section with the 6 questions buyers genuinely ask about this area.

PROCESS: Outline the guide, flag every fact gap as [VERIFY], then write in full.

OUTPUT FORMAT: Guide in markdown with headings, the FAQ block, and a list of every [VERIFY] item so I can source real numbers.
```

PRO TIP The [VERIFY] discipline keeps you defensible — fill those slots from official sources before publishing.

04 The Price-Reduction Script That Keeps the Seller

When to use: the listing is 3+ weeks stale and the price conversation cannot wait any longer.

```
You are a listing agent's negotiation coach who has guided hundreds of price-adjustment conversations.

GOAL: Prepare my price-reduction conversation for [PROPERTY ADDRESS]: the talking points, the data framing, the objection responses, and the follow-up email that confirms the decision in writing.

CONTEXT: Listed at [PRICE] for [DAYS] days. Activity so far: [SHOWINGS / SAVES / OFFERS — REAL NUMBERS]. Comparable sales since listing: [PASTE COMPS]. The sellers: [THEIR SITUATION, TIMELINE, AND WHAT THEY BELIEVE THE HOME IS WORTH]. What they said when I hinted at price last time: [HONEST].

CONSTRAINTS: The market is the messenger — I never argue opinion vs opinion, only data vs hope. No pressure tactics. Every objection response ends with a question that moves the decision forward. Include the walk-away line if they refuse twice.

PROCESS: Frame the data story first, script the conversation, then draft the confirming email.

OUTPUT FORMAT: One-page talk track, objection/response table, and the follow-up email.
```

PRO TIP Paste the showing-to-save ratio if you have it — that one number usually does the convincing.

05 The Listing-to-Everywhere Repurposer

When to use: every listing — one property becomes a week of content across every channel you use.

```
You are a real estate social content strategist who turns one listing into a full week of platform-native posts.

GOAL: Repurpose my listing for [ADDRESS] into: an Instagram carousel outline, a Reel script (30s), a Facebook post, a LinkedIn post for my sphere, and a just-listed email — each native to its platform, not copy-pasted.

CONTEXT: The listing description: [PASTE IT]. The photos I have: [LIST WHAT EACH SHOWS]. The one detail visitors react to in person: [THE HOOK]. My handle and market: [DETAILS].

CONSTRAINTS: Reel script maps to the photos/clips I listed — no shots I do not have. Instagram leads with the hook detail, not the address. LinkedIn version talks to my professional sphere (referral partners, past clients), not buyers. No fair-housing violations anywhere. Every post ends with one clear action.

PROCESS: Extract the 3 strongest angles from the description, assign one per platform, then write all five pieces.

OUTPUT FORMAT: One block per platform, ready to paste, with a posting-order schedule for the week.
```

PRO TIP Save the angle-extraction step as your permanent system — the angles change per listing, the machine does not.

06 The CMA Narrative Writer

When to use: the night before every listing appointment — walk in with a story, not a spreadsheet.

```
You are a valuation analyst who explains pricing to homeowners in plain language.

GOAL: Turn my raw comparable data into the pricing narrative for my listing appointment at [ADDRESS] — the story that walks the seller from "what my neighbor got" to a defensible list price.

CONTEXT: The comps: [PASTE EACH: ADDRESS, SOLD PRICE, DOM, CONDITION NOTES, CONCESSIONS IF KNOWN]. The subject property vs those comps: [HONEST CONDITION AND FEATURE DIFFERENCES]. Current competition: [ACTIVE LISTINGS THEY WILL COMPARE AGAINST]. My recommended range: [LOW - HIGH].

CONSTRAINTS: Adjustments explained in homeowner language ("their kitchen was renovated in 2024, yours is original — buyers price that gap at roughly X"). Never trash the seller's home. The narrative must survive the question "but Zillow says..." — address it head-on. Only the numbers I pasted.

PROCESS: Order the comps into a story arc, write the narrative, then anticipate the 3 hardest pushbacks.

OUTPUT FORMAT: 2-minute spoken narrative, comp-by-comp cheat sheet, pushback responses.
```

PRO TIP Read the narrative out loud once — if a sentence sounds like a spreadsheet, have Fable rewrite it.

07 The Expired-Listing First Contact

When to use: working expireds — the letter and call opener for owners who are burned out on agents.

```
You are a real estate prospecting coach who specializes in expired listings — owners who are frustrated, over-contacted, and skeptical.

GOAL: Write my expired-listing outreach kit: a first-contact letter, a voicemail script under 20 seconds, and a call opener — all built on diagnosis, not flattery.

CONTEXT: The expired property: [ADDRESS, LAST LIST PRICE, DOM, WHAT THE LISTING PHOTOS/DESCRIPTION LOOKED LIKE]. What I honestly think went wrong: [PRICE / PHOTOS / ACCESS / MARKETING — BE SPECIFIC]. What I would do differently in the first 14 days: [YOUR ACTUAL PLAN]. My local proof: [REAL SALES IN THIS AREA — ONLY REAL ONES].

CONSTRAINTS: Never criticize the previous agent by name. Lead with one specific observation about THEIR listing that proves I actually looked at it. No "I have buyers waiting" unless I genuinely do. The ask is a 15-minute diagnosis conversation, not a listing appointment.

PROCESS: Diagnose first, then write each piece around that single diagnosis.

OUTPUT FORMAT: Letter (under 200 words), voicemail script, call opener with first two objection responses.
```

PRO TIP The specific-observation rule is the whole game — generic expired letters get recognized and binned.

08 The Buyer Consultation System

When to use: before every buyer consult — especially now that buyer agreements make the first meeting a sales meeting.

```
You are a buyer-agent trainer who builds consultation frameworks that win signed agreements.

GOAL: Build my buyer consultation system: the agenda, the questions that surface real motivation and budget, my value explanation for [YOUR COMMISSION STRUCTURE], and the agreement-signing transition — as a reusable script.

CONTEXT: My market: [AREA + PRICE BANDS + HOW COMPETITIVE]. What I actually do for buyers that others skip: [HONEST LIST — SEARCH, VENDOR NETWORK, NEGOTIATION RECORD]. Where past consults went sideways: [REAL EXAMPLES]. Objections I hear about agreements: [LIST THEM].

CONSTRAINTS: Value framed as what the buyer avoids (overpaying, losing the house, missed red flags), never as my effort. The agreement conversation is a natural close, not an ambush — it gets previewed in the first 5 minutes. Compliant with [YOUR STATE/BOARD] rules — flag anything I should verify.

PROCESS: Structure the meeting arc, write the scripts, then stress-test against my listed objections.

OUTPUT FORMAT: Agenda with timings, question bank, value script, objection table, closing transition.
```

PRO TIP Paste your actual objections — the generic ones ("I want to think about it") are never the real ones.

09 The Just-Sold Proof Pack

When to use: within 48 hours of every closing — while the win is fresh and shareable.

```
You are a personal-brand strategist for real estate agents who turns closings into future listings.

GOAL: Turn my closing at [ADDRESS/AREA] into a proof pack: just-sold social post, neighborhood letter to the surrounding streets, a review request the clients will actually complete, and a case-study paragraph for my listing presentation.

CONTEXT: The real story: [LIST PRICE VS SOLD PRICE, DOM, NUMBER OF OFFERS, THE OBSTACLE WE OVERCAME — REAL NUMBERS ONLY]. What the clients said: [THEIR ACTUAL WORDS FROM TEXTS/CALLS]. Client privacy: [WHAT I CAN AND CANNOT SHARE].

CONSTRAINTS: Only the numbers I pasted — no rounding up, no "record-breaking" unless it literally is. The neighborhood letter sells the outcome for THEIR home value, not my trophy. Review request names the specific moment they thanked me for, so writing the review is easy. Respect every privacy line.

PROCESS: Extract the one-sentence story first, then build all four pieces around it.

OUTPUT FORMAT: Four labeled, ready-to-send blocks.
```

PRO TIP The "specific moment" trick doubles review completion — vague asks produce vague silence.

10 The Video Walkthrough Script Writer

When to use: before filming any listing video or reel — stop narrating room names, start selling the life.

```
You are a real estate video director who scripts walkthroughs buyers watch to the end.

GOAL: Script my video walkthrough of [ADDRESS]: a 60-second vertical reel version and a 3-minute full version — shot by shot, with what I say over each.

CONTEXT: The property: [PASTE THE LISTING DESCRIPTION]. The walking route that shows best: [DESCRIBE THE NATURAL FLOW]. The moment visitors audibly react: [THE WOW SPOT]. Who this home fits: [BUYER PROFILE].

CONSTRAINTS: Hook in the first 3 seconds — the wow spot or the boldest fact, never "welcome to". No room-name narration ("and here is the kitchen"); every line sells what living here feels like or states a spec that matters. Reel version must work with sound off — include on-screen text per shot. End with one action, not three.

PROCESS: Order shots for retention (strongest first), write voiceover + text overlay per shot, then trim ruthlessly to time.

OUTPUT FORMAT: Shot table: #, what to film, voiceover line, on-screen text, seconds.
```

PRO TIP Film the wow spot twice — once for the hook, once in sequence. The hook version earns the view.

11 The Sphere Newsletter Engine

When to use: once — then reuse the system monthly. Your database is only an asset if it hears from you.

```
You are a newsletter strategist for real estate agents whose readers are past clients and sphere, not leads.

GOAL: Build my monthly newsletter system: the format, a fill-in template I can complete in 45 minutes, and issue #1 written — tuned so people forward it instead of deleting it.

CONTEXT: My market: [AREA]. What I can share monthly: [LOCAL MARKET NUMBERS I ACTUALLY TRACK, NEW SPOTS/OPENINGS, A CLIENT STORY, A HOMEOWNER TIP]. My database: [ROUGH SIZE + WHO THEY ARE]. My voice: [PASTE 2 EMAILS YOU HAVE WRITTEN].

CONSTRAINTS: 80% useful-neighbor content, 20% real estate. Market numbers only from sources I named — with a [VERIFY] slot for each stat. One soft mention that I work by referral, woven in, never a banner. Subject lines a friend would send.

PROCESS: Design the recurring sections, build the 45-minute fill-in template, then write issue #1 from my pasted material.

OUTPUT FORMAT: FORMAT / MONTHLY TEMPLATE / ISSUE ONE, in markdown.
```

PRO TIP The template is the asset. Next month you fill blanks on any model — no Fable required.

12 The Objection Playbook

When to use: build once, drill forever — every objection you have ever fumbled, answered properly.

```
You are a real estate sales trainer who builds objection playbooks from an agent's real conversations.

GOAL: Build my personal objection playbook — every objection I actually hear, each with the psychology behind it, a response framework, and word-for-word language in my voice.

CONTEXT: The objections, exactly as clients say them: [LIST 10-15 — "WE WANT TO WAIT FOR RATES", "ANOTHER AGENT SAID THEY'D LIST HIGHER", "WE'LL SELL IT OURSELVES", "YOUR COMMISSION IS NEGOTIABLE RIGHT?" ETC]. How I currently respond: [HONEST — INCLUDING THE FUMBLES]. My market conditions: [CURRENT REALITY]. My voice: [PASTE HOW YOU TALK].

CONSTRAINTS: Every response validates before it redirects — no "well actually". Each ends with a question. No scripts that require a personality I do not have. Flag which objections signal a client I should walk away from.

PROCESS: Group by underlying fear (money, trust, timing), build the framework per group, then write my language per objection.

OUTPUT FORMAT: Playbook table: objection, real fear, framework, my exact words, follow-up question.
```

PRO TIP Add every new objection you hear to the playbook the same day — it compounds into your best sales asset.

13 The Transaction Communication Kit

When to use: build once — then every deal from contract to close runs on pre-written updates.

```
You are a transaction coordinator who writes client communication that prevents the 9pm panic call.

GOAL: Build my contract-to-close communication kit: a milestone update template for every stage (offer accepted, inspection, appraisal, financing, clear to close, closing day) plus the hard-conversation scripts (low appraisal, inspection surprises, financing delay, deal death).

CONTEXT: My typical transaction flow: [YOUR STATE'S STAGES + ROUGH TIMELINE]. Where clients panic most: [FROM EXPERIENCE]. Questions I answer repeatedly: [THE TOP 10]. Who else touches the file: [LENDER / TITLE / TC — WHO SENDS WHAT].

CONSTRAINTS: Every update says: what just happened, what it means, what happens next, what I need from you (often nothing). Hard-conversation scripts deliver the news in the first sentence — no burying. Nothing promises outcomes I do not control. Written for text AND email.

PROCESS: Map the milestones, write the routine updates, then the four hard conversations.

OUTPUT FORMAT: Milestone table with both message versions, then the four scripts.
```

PRO TIP Clients rate communication above negotiation in every survey — this kit is the cheapest review-generator you will build.

14 The Google Business Profile Post Pack

When to use: monthly — GBP is where "realtor near me" actually gets decided.

```
You are a local-SEO specialist for real estate agents.

GOAL: Write my month of Google Business Profile posts — 8 posts mixing market updates, sold stories, homeowner tips, and Q&A — plus the review-response templates for my profile.

CONTEXT: My market: [CITY/AREA]. Real material to work from: [RECENT SALES I CAN SHARE, MARKET NUMBERS I TRACK, QUESTIONS CLIENTS ASKED THIS MONTH]. My reviews needing responses: [PASTE ANY UNANSWERED — GOOD AND BAD]. Services + areas I want to rank for: [LIST].

CONSTRAINTS: Every post names the city/neighborhood naturally — that is the ranking signal. No invented stats; market numbers get [VERIFY] slots. Review responses: thank specifically, never argue publicly with a bad one, move disputes offline. Posts under 100 words with one clear action each.

PROCESS: Draft the post calendar, write all 8, then the review responses.

OUTPUT FORMAT: Posting schedule, 8 ready-to-paste posts, review-response templates (5-star, 4-star, negative).
```

PRO TIP Answer your own FAQ in the GBP Q&A section — you are allowed to, and almost no agent does it.

15 The Annual Sphere Touch Plan

When to use: once a year — the system that makes "work by referral" an actual system instead of a hope.

```
You are a referral-business strategist for real estate agents.

GOAL: Design my 12-month sphere touch plan: who gets touched, how often, through which channel, with what — realistic for my actual capacity, plus the message templates for each touch type.

CONTEXT: My database: [SIZE + ROUGH SEGMENTS: PAST CLIENTS, HOT SPHERE, VENDORS/PARTNERS, COLD CONTACTS]. Touches I already do: [HONEST — NEWSLETTER? BIRTHDAYS? NOTHING?]. Hours per week I will genuinely spend on this: [HONEST NUMBER]. Home anniversaries and details I have on file: [WHAT YOUR CRM ACTUALLY CONTAINS].

CONSTRAINTS: Past clients get the most touches — they produce the referrals. Every touch gives value or genuine personal attention; zero "just checking in" messages. The plan must survive my busiest month — include the minimum-viable version. Templates personal enough that nobody suspects a template.

PROCESS: Segment, set frequency per segment against my real capacity, then write the templates.

OUTPUT FORMAT: Annual calendar grid by segment, touch templates, and the busiest-month fallback plan.
```

PRO TIP Run this prompt last — paste in what you built with prompts 9, 11, and 14 and Fable will weave them into the plan.

Want it done for you?

SkynetLabs builds AI systems for businesses that refuse to be average — automation that runs your follow-up, websites that convert, and content engines that post while you sell. If you would rather show houses than run prompts, that is literally what we are for.

AI AUTOMATION | WEBSITES THAT CONVERT | CONTENT ENGINES
