FOR LOCAL BUSINESSES · FREE PROMPT PACK

10 Fable 5 Prompts for Local Businesses That Hate Marketing.

Google profile, review replies, follow-ups, no-show fixes — 10 copy-paste prompts for clinic, shop, salon, and trade owners who'd rather run the business than market it. Each one produces a **reusable system**, not a one-off answer.

WORKS ON ANY CLAUDE MODEL

Fable 5 is included on Max and Team Premium plans (up to 50% of your weekly limits). On Pro and Team Standard it runs on usage credits. Every prompt in this pack is model-agnostic — it works on whichever Claude model you have.

GOOGLE PROFILE · REVIEWS · FOLLOW-UP · LOCAL SEO

By Waseem Nasir · SkynetLabs · @skynetlabs

Three steps. That's it.

No marketing degree, no software to install. If you have a paid Claude plan, you already have everything you need.

1

Open Claude and pick Fable 5

Go to `claude.ai` and select **Fable 5** from the model picker. On Max and Team Premium it is included, up to 50% of your weekly usage; on Pro it runs on usage credits. Any Claude model will run these prompts.

2

Paste a prompt, fill the brackets

Copy any prompt from this pack and replace everything in `[BRACKETS]` with your real details — your actual services, your real reviews, the questions customers actually ask at your front desk. The more real material you paste, the better the output. Fable 5 handles huge amounts of pasted text, so don't hold back.

3

Save the output and reuse it

Every prompt here returns something you keep — reply templates, a post calendar, phone scripts, a checklist. Save it, hand it to your staff, run it again next month. When a prompt earns its keep twice, ask Claude: `"Convert what we just did into a reusable skill"` — and it's yours on any model, forever.

> **Why these work:** each prompt follows the same skeleton — who Claude should act as, the goal, your real details, hard rules, and the exact format you want back. Fable 5 plans backward from goals; these prompts hand it the goal and get out of the way.

01 The Google Business Profile Overhaul

WHEN TO USE — people find you on Google Maps, but your profile hasn't been touched since you set it up.

```
You are a local search specialist who fixes Google Business
              Profiles for small businesses. GOAL: Overhaul my Google Business
              Profile — the questions locals actually ask before choosing a
              business like mine, with clear self-contained answers I can paste
              into my description, services, and Q&A section. CONTEXT: My
              business:
              [NAME + WHAT YOU DO + TOWN/SUBURB]. My
              services and prices I'm comfortable showing:
              [LIST]. What makes people pick us, with
              proof: [REAL REASONS ONLY]. What my current
              profile says: [PASTE IT, EVEN IF EMPTY].
              CONSTRAINTS: Every answer must stand alone in 40-80 words and
              mention my business naturally exactly once. No superlatives
              without proof — "family-run since 2011" beats "best in town."
              Write like a person, not a brochure. If I'm a clinic or health
              practice: never reference any identifiable patient. PROCESS: List
              the 20 questions locals ask first, then write the answers, then
              tell me exactly where each one goes on the profile. OUTPUT FORMAT:
              The question list, the answers ready to paste, and a
              10-minute-a-month upkeep checklist.
```

PRO TIP — paste your competitors' profiles too. The gaps in theirs become the answers in yours.

02 The Review Reply System

WHEN TO USE — reviews sit unanswered for weeks because you never know what to say, especially to the angry ones.

```
You are a reputation manager who writes review replies for local
              businesses. GOAL: Build my review reply system — templates for
              every kind of review, so any reply takes two minutes and sounds
              like me, not a robot. CONTEXT: My business:
              [WHAT YOU DO + TOWN]. Recent reviews,
              pasted word for word:
              [PASTE 5-10, INCLUDING THE BAD ONES]. How I
              actually talk to customers:
              [PASTE A TEXT OR EMAIL YOU'VE SENT].
              CONSTRAINTS: Separate templates for 5-star, mixed, and angry
              reviews. Never argue publicly — angry reviews get one calm reply
              and an offer to take it offline, with an escalation path for
              anything serious (legal threats, health complaints). If I'm a
              clinic: never confirm someone was a patient or mention any
              treatment in a reply, even when they mention it first. PROCESS:
              Study my pasted reviews and voice, draft the templates, then reply
              to each pasted review using them so I can see the system working.
              OUTPUT FORMAT: The template set, the escalation rules, and my
              pasted reviews answered.
```

PRO TIP — the angry-review template is the one that pays. One calm, professional reply is read by hundreds of future customers; the argument is too.

03 The Review-Ask Follow-Up

WHEN TO USE — happy customers walk out the door every day and never leave a review, because nobody asks them.

```
You are a follow-up copywriter for local service businesses.
              GOAL: Write my review-ask sequence — the short text and email
              messages that go out after a job or visit, timed so happy
              customers actually leave a review. CONTEXT: My business:
              [WHAT YOU DO]. What a finished job or visit
              looks like:
              [E.G. CHECKOUT, INVOICE PAID, TREATMENT DONE]. My Google review link:
              [PASTE, OR SAY "HELP ME FIND IT"]. How I
              talk: [PASTE A MESSAGE YOU'VE SENT].
              CONSTRAINTS: Two touches maximum — one ask, one gentle reminder,
              then stop. Never offer discounts or gifts for reviews; that breaks
              Google's rules. Each message under 50 words with the link doing
              the work. Include timing (how many hours or days after the visit)
              and a simple rule for who NOT to ask. If I'm a health practice:
              messages must not mention what the visit was for. PROCESS: Draft
              the sequence, then a version for text and a version for email,
              then the one-line script my staff say in person. OUTPUT FORMAT:
              The messages with send timing, the in-person line, and the
              do-not-ask rule.
```

PRO TIP — the in-person line matters most. "You'll get a text from us with a review link — it really helps us" doubles how many people follow through.

04 30 Days of Posts From What You Already Do

WHEN TO USE — you know you should post but never know what, so the page has been quiet since March.

```
You are a content planner for local businesses who turns real
              daily work into posts. GOAL: Build my 30-day posting plan using
              only things that already happen in my business — no filming days,
              no stock photos, nothing invented. CONTEXT: My business and a
              typical week:
              [WHAT YOU DO, WALK ME THROUGH A WEEK].
              Photos I could realistically take:
              [E.G. FINISHED JOBS, THE SHOP, THE TEAM, BEFORE/AFTERS]. Questions customers ask constantly:
              [LIST 10]. Platforms:
              [FACEBOOK / INSTAGRAM / GOOGLE POSTS].
              CONSTRAINTS: Every post idea uses a photo or fact I actually have.
              Mix: real work shown, questions answered, behind the scenes, and
              only a handful of direct "book now" posts. No invented customer
              stories. If I'm a clinic: no patient photos or stories without
              written consent — flag every idea that would need it. PROCESS:
              Mine my week for post material, build the 30-day table, then write
              the first 5 captions in my voice. OUTPUT FORMAT: 30-day table
              (day, idea, photo needed, caption starter), the 5 written
              captions, and the 15-minute weekly routine to keep it going.
```

PRO TIP — before/after photos of real work outperform anything a designer makes. One phone photo per day is the whole system.

05 The No-Show Killer Follow-Up Sequence

WHEN TO USE — empty chairs and missed appointments are quietly costing you more than any ad ever could.

```
You are an appointment-systems designer for local businesses.
GOAL: Design my reminder and win-back system — the messages that
stop no-shows before they happen, and the ones that bring back
customers who haven't been in for months. CONTEXT: My business and
how people book:
[PHONE / ONLINE / WALK-IN]. My no-show
reality:
[HONEST GUESS — HOW MANY PER WEEK]. What a
missed slot costs me: [ROUGH NUMBER]. Tools
I have:
[JUST MY PHONE / BOOKING APP / CRM NAME].
CONSTRAINTS: Every message has a clear trigger (24h before, 2h
before, missed appointment, 6 months quiet) and a stop condition —
nobody gets messaged forever. Reminders make cancelling easy; a
freed slot beats an empty one. Friendly, short, sounds like a
person. If I'm a health practice: reminders must not state what
the appointment is for. PROCESS: Map the moments where people slip
through, write the message for each, then give me the simplest way
to run it with the tools I named. OUTPUT FORMAT: Message set with
triggers and stop rules, plus a manual-mode checklist if I have no
software.
```

PRO TIP — the 6-months-quiet win-back message is nearly free money. It goes to people who already know and trust you.

06 Website Copy That Sounds Like You

WHEN TO USE — your website reads like it was written by a stranger in a suit, and you cringe sending people to it.

```
You are a copywriter who makes small-business websites sound like
their owners. GOAL: Rewrite my website copy so it reads the way I
actually talk to customers — clear, warm, and specific to my town
— without a single line of marketing fluff. CONTEXT: My current
website text: [PASTE IT ALL]. How I really
talk: paste things I've actually written to customers —
[TEXTS, EMAILS, WHATSAPP REPLIES]. What
customers say when they recommend us:
[THEIR WORDS IF YOU KNOW THEM]. What I want
visitors to do: [CALL / BOOK / VISIT].
CONSTRAINTS: Match my pasted voice exactly — if I say "pop in,"
the site says "pop in." Kill every phrase I'd never say out loud
("solutions," "passionate about excellence"). Real details over
adjectives. One clear action per page. No claims I can't back up.
PROCESS: Study my voice samples first and list its patterns, then
rewrite page by page, then read it back against my samples and
patch anything that drifted. OUTPUT FORMAT: Rewritten copy per
page, with a short "voice rules" card I can hand to anyone who
writes for us later.
```

PRO TIP — your WhatsApp replies to customers are the best voice sample you own. Paste ten of them.

07 The Neighborhood Competitor Check

WHEN TO USE — the place three streets over is always busy and you want to know what they're doing that you're not.

```
You are a fair-minded analyst who compares local businesses using
only what's publicly visible. GOAL: Compare my business against my
nearest competitors and tell me the honest gaps — plus the blank
checklist so I can rerun this every few months. CONTEXT: My
business: [NAME + WHAT YOU DO + TOWN].
Competitors: [2-3 NAMES]. What I've
collected about them:
[PASTE THEIR WEBSITE TEXT, GOOGLE PROFILE INFO, REVIEWS, PRICES
  IF SHOWN]. Same for mine: [PASTE YOURS].
CONSTRAINTS: Only conclusions supported by what I pasted — mark
anything you're guessing as INFERRED. Look for practical gaps:
they answer reviews and I don't, their prices are visible and mine
aren't, they show photos of real work. No trash-talk; I want the
list of things to fix, not reasons to feel bad. PROCESS: Build the
comparison checklist first, fill it for each business including
mine, then rank my gaps by effort versus payoff. OUTPUT FORMAT:
Comparison table, my top 5 gaps ranked easiest-first, and the
blank checklist for next quarter.
```

PRO TIP — read their worst reviews closely. What their unhappy customers complain about is exactly what your Google profile should promise.

08 The Front-Desk FAQ + Phone Script Pack

WHEN TO USE — every call gets answered differently depending on who picks up, and only you know the right answers.

```
You are a trainer who turns an owner's knowledge into scripts any
staff member can use. GOAL: Turn my most-asked questions into a
front-desk pack — phone scripts, text replies, and a printed FAQ
sheet — so every customer gets the same right answer no matter who
answers. CONTEXT: The questions we get constantly:
[LIST YOUR TOP 20 — PRICES, HOURS, "DO YOU DO...", PARKING,
  INSURANCE, EMERGENCIES]. My correct answer to each, roughly:
[BRAIN-DUMP, MESSY IS FINE]. Things staff
must NEVER promise:
[E.G. EXACT QUOTES OVER PHONE, SQUEEZE-INS]. CONSTRAINTS: Scripts in plain spoken language a new hire can
read aloud without sounding robotic. Every script ends with a next
step (book, take a number, transfer). Include a "when to get the
owner" escalation list. If I'm a clinic: staff never discuss a
patient's details on the phone with anyone but the patient.
PROCESS: Sort my questions by how often they cost us a booking,
write the scripts, then the one-page printout. OUTPUT FORMAT:
Phone scripts, matching text-message replies, the printable FAQ
sheet, and the never-promise list.
```

PRO TIP — record yourself answering the top 5 questions, transcribe it, and paste that. The scripts will sound exactly like the business.

09 The "Which Marketing Is Worth It" Audit

WHEN TO USE — you're paying for ads, a directory listing, and a social media person, and you honestly can't say what any of it brings in.

```
You are a no-nonsense advisor who tells small businesses which
              marketing to keep, cut, or try — including the things NOT worth
              doing. GOAL: Audit everything I spend money or time on to get
              customers, and rank it by what it really returns — with a keep /
              cut / try verdict per item and a NEVER-DO list for my kind of
              business. CONTEXT: Everything I currently do or pay for:
              [LIST: ADS, DIRECTORIES, SOCIAL, FLYERS, SPONSORSHIPS — WITH
                ROUGH COST AND TIME EACH]. Where my last 20 customers actually came from:
              [ASK THEM IF YOU DON'T KNOW]. What a new
              customer is worth to me over a year:
              [ROUGH NUMBER]. CONSTRAINTS: Judge by
              customers brought in, not likes or impressions. Hidden time counts
              as cost. "It's what everyone does" is not a reason. NEVER-DO is a
              required section — the stuff that eats money in my niche. Each
              "keep" gets one line on how to squeeze more from it. PROCESS:
              Score every item on cost versus customers, rank, then sanity-check
              the verdicts against where my last 20 customers really came from.
              OUTPUT FORMAT: Ranked table (item, cost, customers, verdict), the
              NEVER-DO list with reasons, and the one thing to try next.
```

PRO TIP — "Where did you hear about us?" asked at the till for two weeks gives you better data than any dashboard.

10 The Monthly Numbers Check

WHEN TO USE — you know roughly how the month went by the feel of the till, but "roughly" is how slow slides sneak up on you.

```
You are a numbers coach for owner-run businesses who hates
              complicated dashboards. GOAL: Give me my monthly numbers check —
              the 5 numbers that tell me if the business is healthy, each with a
              simple good / watch / worry threshold and the decision it should
              trigger. CONTEXT: My business and how money comes in:
              [APPOINTMENTS / JOBS / WALK-INS / REPEAT CUSTOMERS]. What I track now:
              [HONEST — EVEN IF "NOTHING"]. Decisions I
              wrestle with:
              [E.G. "CAN I HIRE?", "SHOULD I RAISE PRICES?", "IS THE QUIET
                MONTH NORMAL?"]. CONSTRAINTS: Five numbers maximum, and each must be collectable
              in under ten minutes a month from things I already have (till,
              bookings, bank statement). Every number connects to a decision —
              no tracking for tracking's sake. Include at least one
              early-warning number (bookings ahead, repeat rate), not just money
              already banked. PROCESS: Propose the numbers, justify each against
              one of my real decisions, cut anything decorative, then set the
              thresholds. OUTPUT FORMAT: A one-page table (number, how to get
              it, thresholds, decision it drives) and a 10-minute end-of-month
              routine.
```

PRO TIP — "bookings ahead" is the number most owners skip and the one that predicts the bad month before it arrives.

WANT IT DONE FOR YOU?

We build the systems.

You run the business.

SkynetLabs builds the boring-but-vital machinery for local businesses — booking funnels, review and follow-up automation, local websites, and GoHighLevel systems that chase the no-shows and ask for the reviews so you don't have to. Real systems, running for real businesses, published openly.
